Hiring Manager

Royal Bank of Canada (RBC)

Toronto, ON

Re: Winter 2026 Cyber Security Analyst Co-op

Dear Hiring Manager,

I am excited to apply for the Cyber Security Analyst Co-op role at RBC. As a Computer Programming and Analysis student at George Brown College and a Google Cybersecurity Certificate graduate, I have developed a strong foundation in network security, log analysis, and incident response, supported by technical experience with Linux, SQL, and programming languages including Python, Java, and C#.

Through hands-on projects, I analyzed network traffic with tcpdump and Wireshark, created incident reports using the NIST Cybersecurity Framework, and applied SIEM concepts to detect anomalies. These experiences taught me how to investigate threats, recommend solutions, and strengthen security posture, skills that align directly with RBC's mission to proactively detect and respond to cyber threats.

I am eager to bring my analytical skills, technical knowledge, and proven teamwork from fast-paced environments to RBC's Technology & Operations team. I would welcome the opportunity to contribute to your cybersecurity efforts while continuing to grow under the guidance of RBC's industry leaders.

Thank you for your time and consideration.

Sincerely,

Lucas Tavares Criscuolo
