BMO Financial Group
Toronto, ON

Re: Software Developer Application

Dear Hiring Team,

I am writing to express my keen interest in the Software Developer role at BMO. As a current student in the Computer Programming and Analysis program at George Brown College, with a strong academic track record and practical experience across the software development lifecycle, I'm excited by the opportunity to grow my skills while contributing to a forward-thinking team that's committed to innovation and impactful change.

My academic journey has equipped me with a solid foundation in programming, systems integration, object-oriented design, and cloud-based technologies. Through hands-on projects and internships, I've developed skills in C#, Java, SQL, and test-driven development, and have worked with tools like Git and Visual Studio. I'm particularly drawn to this role's emphasis on developing secure, high-quality software that supports real-world business needs, a space where I thrive both technically and creatively.

BMO's reputation for empowering employees and driving positive change deeply resonates with my values. I am eager to join a collaborative, mission-driven team where I can build meaningful technology while continuing to grow both personally and professionally.

Thank you for considering my application. I would be thrilled to discuss how I can contribute to your team and am available for an interview at your earliest convenience.

Regards,
Lucas Tavares Criscuolo
