Re: 2026 Winter Student Work Placement – IT and Cyber (Requisition Number: 11021)

Dear Hiring Manager,

I am writing to express my interest in the Winter 2026 IT and Cyber Student Work Placement at the Bank of Canada. As a student in the Computer Programming and Analysis Advanced Diploma program at George Brown College and a graduate of the Google Cybersecurity Professional Certificate, I have developed a strong technical foundation in network security, incident response, and systems analysis, complemented by hands-on experience in programming and IT systems.

Through my cybersecurity training, I gained practical experience analyzing network traffic with Wireshark and tcpdump, conducting incident reporting using the NIST Cybersecurity Framework, and applying Linux and SQL for system auditing and security data analysis. These projects strengthened my ability to detect vulnerabilities, analyze threats, and recommend protective measures—skills that directly align with the Bank’s mission to maintain resilient operations and secure evolving technology platforms. In addition, my programming background in C#, Java, SQL, and Python equips me to bridge development and cybersecurity, contributing to both technical solutions and proactive defenses.

I am particularly motivated by the Bank’s commitment to excellence, integrity, and inclusivity, as well as its role at the center of Canada’s economy. I am eager to bring my problem-solving skills, adaptability, and collaborative approach to your team, while continuing to grow as an IT and Cyber professional in a dynamic and impactful environment.

Thank you for considering my application. I look forward to the possibility of contributing to the Bank of Canada’s important work and to discussing how my skills and training can support your IT and Cyber initiatives.

Sincerely,

Lucas Tavares Criscuolo
