Hiring Manager
Canada Life
Toronto, ON

Dear Hiring Manager,

I am writing to express my keen interest in the Software Developer (Student Position) at Canada Life, as advertised. Currently, I am pursuing an Ontario College Advanced Diploma in Computer Programming and Analysis at George Brown College and expect to graduate in March 2026. With my strong foundation in web development and hands-on experience through rigorous coursework in full-stack development, advanced web programming, and database management, I am confident in my ability to contribute effectively to your team during this four-month placement starting in May 2025.

During my academic career, I have developed proficiency in various programming languages and technologies including JavaScript, HTML, CSS3, and modern frameworks, which align well with the technical areas highlighted in the job description. I have also gained a solid understanding of both front-end and back-end development principles through practical projects and collaborative assignments. This technical background, combined with my proven ability to analyze and solve complex problems, will allow me to support software maintenance, enhance existing applications, and conduct functional testing effectively.

Beyond my technical skills, my diverse work experiences have sharpened my teamwork, communication, and time management abilities. I thrive in collaborative environments and am excited about the opportunity to work virtually with a coach/mentor and the dynamic team at Canada Life. I am eager to contribute to your process improvement initiatives while expanding my expertise in areas such as data analysis, API integration, and containerized application deployment.

Canada Life's commitment to fostering an inclusive and innovative workplace resonates with me, and I am enthusiastic about the prospect of helping deliver exceptional customer and advisor experiences. I am confident that my background, skills, and proactive approach make me a strong candidate for this role.

Thank you for considering my application. I look forward to the opportunity to discuss how my academic achievements and technical skills can contribute to the success of your team.

Sincerely, Lucas Tavares Criscuolo
