Re: Software Developer in Test Intern – Fall 2025 (8 months)

Dear Hiring Team,

I am excited to apply for the Software Developer in Test Intern position at Dayforce. As a student in the fifth semester of the **Computer Programming and Analysis** program at George Brown College with a **3.40 GPA**, I bring a strong foundation in software development, object-oriented programming, and hands-on testing practices. I am eager to apply and expand my technical skills while contributing to meaningful, real-world projects in a collaborative, agile environment like yours.

Through my academic experience, I've worked on full-stack web applications, including a smart inventory management system built with **ASP.NET Core MVC, C#, and PostgreSQL**, hosted on **Microsoft Azure**. I've also contributed to backend logic and testing frameworks in team-based Java projects. These experiences have strengthened my abilities in **SQL**, debugging, and writing clean, maintainable code.

I am particularly drawn to this opportunity at Dayforce because of your global impact in HCM technology and commitment to making work life better. Your use of modern tools such as **Kafka**, **Azure**, and **microservices architecture** strongly aligns with my interests and learning goals. I am confident in my ability to contribute effectively to your teams while growing professionally through your mentorship and development programs.

Thank you for considering my application. I look forward to the opportunity to support your team's efforts in building scalable, high-performing software solutions. I am available full-time beginning in Fall 2025 and can be reached at +1 437-254-6527 or lucastcriscuolo@gmail.com.

Sincerely,

Lucas Tavares Criscuolo
