Hiring Manager
Konrad
Toronto, ON

Re: Software Developer Intern – May 2026 (4-month)

Dear Hiring Manager,

I am a third-year Computer Programming & Analysis student at George Brown College (expected graduation March 2026), and I am excited to apply for the Software Developer Intern position at Konrad. Through my coursework and personal projects, I've built a solid foundation in both front-end and back-end development, and I'm eager to collaborate with Konrad's world-class team to deliver high-quality digital solutions.

In my Advanced Web Programming and Data Structures & Algorithms courses, I designed and built responsive web interfaces using HTML, CSS, and JavaScript, and implemented RESTful services in Java. For example, in a recent team project, I developed an interactive single-page application that consumed a Java-based API and included unit tests to ensure reliability. I've also created a Python-scripted game as a side project, which honed my ability to write clean, maintainable, and testable code. These experiences have taught me the importance of code reviews, automated testing, and clear documentation, all of which align with Konrad's emphasis on software quality.

Beyond technical skills, I thrive in collaborative environments. As an Event Manager and customer-service professional, I learned to communicate clearly, adapt to tight deadlines, and share insights with diverse teams. I am passionate about researching new technologies—whether it's a JavaScript framework or a CI/CD tool, and presenting my findings to peers to improve our collective workflow.

Konrad's reputation for innovation, mentorship, and best-in-class digital products excites me. I am eager to learn from your engineers, contribute to both front-end and back-end tasks, and help build solutions that serve millions of users. Thank you for considering my application. I welcome the opportunity to further discuss how my background and enthusiasm can support Konrad's mission.

Respectfully,

Lucas Tavares Criscuolo
