Re: Software Engineer Co-op Student (September 2025 Intake)

Dear Hiring Team,

I'm a Computer Programming & Analysis student at George Brown College (graduating March 2026) and I'd love to join Foresters Financial as a Software Engineer Co-op this September. My hands-on projects in Python and .NET, combined with Azure DevOps exposure, make me confident I can add value right away.

In my recent coursework, I built and deployed a student-performance prediction model using scikit-learn and TensorFlow, handling all data preprocessing and evaluation steps. I've also developed an ASP.NET Core MVC app in C#, setting up CI/CD pipelines in Azure DevOps to automate testing and deployments. These experiences taught me to write clear, maintainable code and to collaborate under Agile practices.

I thrive in team settings, whether contributing to design discussions in my Smart Inventory Management System project or sharing new tooling insights with peers. I'm eager to learn from your architects and engineers, and to help build robust AI/ML solutions for Foresters.

Thank you for considering my application. I look forward to discussing how my skills and enthusiasm align with your team's goals.

Respectfully,
Lucas Tavares Criscuolo
