Hiring Manager
Motorola Solutions
Concord, ON (Hybrid)

Re: Software Development 2025 Co-Op

Dear Hiring Manager,

I am excited to submit my application for the Software Development 2025 Co-Op position at Motorola Solutions. Currently pursuing an Ontario College Advanced Diploma in Computer Programming and Analysis at George Brown College, I have developed a solid foundation in software development, testing, and quality assurance. I am eager to apply my technical expertise and passion for innovative digital solutions within your Futurism Engineering team, contributing to projects that support mission-critical communications and safety technologies.

During my academic journey, I have led and collaborated on several projects that mirror the responsibilities of this role. For instance, in the Smart Inventory Management System project, I designed and developed a comprehensive web-based solution using ASP.NET Core MVC and C#. This experience not only honed my skills in creating dynamic user interfaces and automated testing strategies but also taught me the importance of rigorous quality assurance to meet user requirements. Additionally, working on a group project to develop a command-line Gomoku game in Java sharpened my analytical and problem-solving abilities, as well as my capacity to work collaboratively in fast-paced environments.

I am particularly drawn to Motorola Solutions because of your commitment to creating secure, innovative technologies that make a real difference in public safety. I am confident that my proficiency in object-oriented programming, automated testing, and scripting as well as my keen attention to detail and collaborative mindset will enable me to contribute effectively to your development team. I am excited about the prospect of both designing test strategies and potentially developing software solutions as I progress through the work term, thereby broadening my skills in a dynamic, hybrid work environment.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, technical skills, and passion for software development align with the goals of Motorola Solutions. Please feel free to contact me at +1 437-254-6527 or via email at lucastcriscuolo@gmail.com.

Sincerely,

Lucas Tavares Criscuolo
