PROFESSIONAL SUMMARY

Motivated and detail-oriented cybersecurity professional with a strong foundation in **network security, incident response, and risk management**. Completed multiple Google Cybersecurity Certificates, gaining hands-on experience in **threat analysis, SIEM tools, log monitoring, vulnerability identification, and network defense**. Currently pursuing an Ontario College Advanced Diploma in **Computer Programming and Analysis** (George Brown College), combining technical programming expertise with applied cybersecurity skills. Passionate about safeguarding systems and data through proactive monitoring, security hardening, and compliance with frameworks such as the **NIST CSF**. Seeking an **Entry-Level Security Analyst** or related cybersecurity role to apply analytical, technical, and problem-solving skills to protect organizational assets.

EDUCATION

George Brown College – Toronto, ON

Ontario College Advanced Diploma in Computer Programming and Analysis

Expected Graduation: April 2026 • GPA: 3.40 • Completed 4/6 semesters

CERTIFICATIONS

- **Google Cybersecurity Certificate** (Completed Courses 1–4)
 - *Foundations of Cybersecurity*
 - *Play It Safe: Manage Security Risks*
 - *Connect and Protect: Networks and Network Security*
 - *Tools of the Trade: Linux and SQL (Applied to Cybersecurity)*
-

CYBERSECURITY PROJECTS & SKILLS

Cybersecurity Projects (Google Certificate)

- **Incident Reports & Network Analysis:** Created detailed incident reports analyzing packet captures (tcpdump, Wireshark) to detect malicious DNS, ICMP, and SYN flood traffic. Applied the **NIST CSF** to recommend improvements for Identify → Protect → Detect → Respond → Recover.
- **Security Audits:** Conducted risk assessments of simulated organizations, identifying vulnerabilities and recommending security controls.
- **SIEM & Log Monitoring:** Analyzed system and network logs to detect anomalies, potential breaches, and unauthorized access attempts.
- **Linux & SQL for Security:** Used Linux commands to manage permissions and audit systems; applied SQL queries to filter and analyze security-relevant data.

Technical Skills

- **Security Tools & Concepts:** SIEM (theory), IDS/IPS, vulnerability management, incident response playbooks, NIST CSF, CIA triad, risk assessments, security hardening, firewalls, VPNs, port filtering, network segmentation.
- **Programming & IT:** C#, Java, SQL, Python (basic), HTML, CSS, JavaScript.
- **Frameworks & Tools:** ASP.NET Core MVC, Git, Microsoft Azure, AJAX, Wireshark (intro), tcpdump (intro).
- **Core Areas:** Cybersecurity fundamentals, log analysis, threat detection, penetration testing (basic), full-stack programming, data structures & algorithms.

RELEVANT EXPERIENCE

Server – Oliver & Bonacini Hospitality, Toronto, ON

Apr 2025 – Present

- Delivered high-end service at corporate and social events, coordinating with staff to manage fast-paced, high-pressure situations.
 - Gained transferable skills in **communication, teamwork, and problem-solving** that support security operations and incident response.
-
